

The changes made in the initial ERD are as follows:

1. We made the relationships in the final ERD clearer and easier to understand by reorganizing the relationship lines and eliminating all the unnecessary relationships.
2. The relationship between customer and payments was superfluous and was removed.
3. The relationship between customer and customer feedback was corrected to be one-to-many.
4. The relationship between event and customer feedback was corrected to be one-to-many.
5. The address attribute was made to be composite and was split into atomic attributes.
6. We also changed the attributes of the Package entity, the final attributes are: Package\_id, Description, Amount.
